## PGHS 2018-20 Strategic Action Plan

### Vision:
All students have the dispositions and ability to design, manage and lead for the futures they want

### Mission:
To implement a more cultural approach to school improvement.

What the research, data, DECD priorities and staff input, tells us in terms of what to focus on to improve our school;

1. Student achievement will not improve unless and until teaching improves. Higher standards, more testing, greater local management, etc. do not, by themselves, improve teaching. (McKinsey, Fullan)
2. Teachers, working alone, with little or no feedback on their teaching, will not be able to improve significantly—no matter how much professional development they receive. (Grattan, William, Cole)
3. Instructional improvement cannot move forward until each school has defined very clearly what good teaching looks like and has developed both collaborative and more formal strategies for providing feedback on improving and developing this teaching practice. (Grattan, Dinham, Wagner)
4. Across the world education systems that have achieved significant gains in student performance over time have developed a coherent school improvement framework that describes excellent practice and how all levels of the system have supported sites with an integrated approach to implementation. (McKinsey, Elmore, Fullan)
5. The concept of a growth mindset can also be applied to the work of school improvement. In this context, a “growth” mindset is a belief in the ability of a school to make continual improvements in how well it is meeting the needs of the students it serves. (Jeff Masters)

Our improvement work is informed by:
1. DECD Priorities
2. Partnership foci
3. NASSSA strategic directions
4. PGHS achievement and wellbeing data
5. PGHS community
